

# The Science of Reading 101

The Science of Reading 101 is the approach to reading instruction that is backed by research as the most effective way to ensure equitable and essential instruction for all students. Although this method of teaching reading is proven to be the most effective, we have been somewhat hesitant to jump on board with it for several reasons. There is no better time, no more critical time, no more important time than now to begin providing equitable and the most effective instruction for our students.

**Jan. 27 & Feb. 24, 2025**

**3:30 p.m- 4:30 p.m.**

## Where

Self-paced, online course via Zoom

## Registration

[Link to Registration](#)

## Session ID

#49555

## Cost

\$150

License renewal additional \$50

## Objectives:

- Learn about the principles of The Science of Reading
- Think about the relationship between other reading approaches in comparison with The Science of Reading
- Watch and read how experts define, discuss, model and explain The Science of Reading
- Learn about the five components needed in a literacy block that supports The Science of Reading
- Analyze their current practices with practices discussed in this course and begin planning for implementation
