AI Passport for Students

Preparing Students for an AI-Driven World

Our AI Passport modules equip students with the essential knowledge and skills to use artificial intelligence effectively and ethically in a school setting. Through engaging, student-friendly lessons, participants will explore AI fundamentals, understand bias and equity issues, master prompt design and explore academic integrity with the use of AI.

Customized Learning & Support

Our AI Passport package is designed to meet your district's unique needs, including:

- **Comprehensive AI Education**: Online modules covering AI basics, bias and equity, prompt engineering and plagiarism and citations.
- **Flexible Implementation**: AI Passport can be integrated into your district's LMS for easy student and teacher access.
- **Educator Readiness**: Teachers can complete the modules first, ensuring they can assist students effectively. A teacher's guide is also included.
